Art Unit: 1711

1. It is requested that applicants supply the months of publication of the "Other Documents" cited on the information disclosure statement of February 17, 1999.

Furthermore, applicants have failed to comply with the requirements set forth within 37 CFR 1.98 (a)(3) with respect to JP 8-53528, JP 5-505845, JP 6-500584, JP 51-73561, JP 63-68625, JP 2-99579, JP 2-102287, JP 3-140388 and, JP 3-281682. Their listing within the International Search Report is insufficient to satisfy the requirement.

2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

3. Claims 18 and 20 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

4. Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It appears that claim 28 should depend from claim 27.

5. Claims 1-17, 19 and 21-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants' Markush groups are improper, because the groups must be specified in the alternative. For example, the last species for the group (I) Markush group of claim 1 should be

Art Unit: 1711

preceded by “or” rather than “and”. The groups are improper for the specified group species and compounds.

Furthermore, it is unclear how instances of “and/or” and occurrences of “and” used with “or” in the same phrase are to be interpreted. See line 5 of claim 2 or lines 3 and 4 of claim 10 or lines 3-5 of claim 12, for example.

6. Claims 1-9, 27-36 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of “can” within the claims renders them indefinite, because it is unclear if or to what extent the language denoted by “can” is a definitive or non-optional limitation.

7. Claims 1-12, 14-17, 19, 21-36 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants have used the language, “simultaneously or sequentially”, throughout the claims; however, it is unclear what is meant by the language. It is not clear what sequence of events the language pertains to.

8. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1711

It is unclear how compound (p) has 0.2 or more active hydrogen atoms. Clarification is required.

9. Claims 14, 15 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

When compounds (t-1), (u-1), or (x-1) are selected, the claims are rendered indefinite, because step (1) of each claim is not required.

10. Claims 16, 21, 22, 27-30, 37 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear that the products I, N, R and V of the second step include reaction schemes wherein the zircoaluminate derivatives are utilized. The confusion stems from the way in which the products are defined within the first steps.

11. Claims 2-17, 19 and 21-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants' claims are replete with terms which lack antecedent basis. Applicants' independent claims make numerous references to species defined within other independent claims. This is impermissible. Each set of claims must clearly provide adequate antecedence solely from within the set. Applicants' lack of antecedence issues are so extreme that they preclude further

Art Unit: 1711

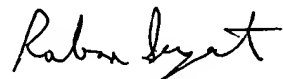

search and consideration of the prior art. For example, independent claim 12 refers to "said compound (a-5)", "said compound (a-2)", "said compound (q)", "said compound (r)", "said compound (i)", "said compound (l)", "said compound (m)", and "the product B"; however, none of these compounds has been defined in claim 12.

12. In view of the severity of the 35 U.S.C. 112 issues and the cited prior art issues of paragraph 1, thorough search and consideration of the prior art was deemed to be unduly burdensome at the time of this examination.
